## Structural Mechanics

8012206-3

### Plane Trusses

Trusses are most commonly used in bridges, roofs and towers as shown in figure (2).

**Figure 2: Commonly used of Truss**

#### Types of plane trusses

Some other truss types seen in roof or bridge structures are shown in figure (3) below:

Pratt Truss

Howe Truss

Deck Pratt Truss

Warren Truss

Parker Truss: Pratt with curved chord

K Truss

Saw-tooth Truss

Three-hinged Arch

**Fig.3- A Different types of plane trusses.**

Fig.3-B Different types of plane trusses.

### Example No 1.

Find all support reactions and member forces of the loaded truss shown by the joint method

$$\sum M_1 = 100 \times 3 + 30 \times 4 - y_3 \times 6 = 0$$

$$y_3 = 70 \text{ kN}$$

$$\sum F_y = y_1 - 100 + 70 = 0$$

$$y_1 = 30 \text{ kN}$$

$$\sin \theta = 0.8, \cos \theta = 0.6$$

$$\sum f_x = 0, \sum f_y = 0, \sum M = 0$$

$$\sum f_x = f_{12} \cos \theta + f_{14} - 30 = 0$$

$$\sum f_y = f_{12} \sin \theta + 30 = 0 \Rightarrow f_{12} = \frac{-30}{0.8} = -37.5 \text{ kN} \Rightarrow 37.5 \text{ kN Comp}$$

$$\sum f_x = -37.5 \times 0.6 + f_{14} - 30 = 0$$

$$f_{14} = 52.5 \text{ kN Ten}$$

at joint 4

$$f_{23} = 52.5 \text{ Ten}$$

at joint 3

$$\sum f_x = f_{23} \times 0.6 - 52.5 = 0$$

$$f_{23} = 87.5 \text{ kN Comp}$$

$$\sum f_y = 70 - 87.5 \times 0.8 = 0$$
